modern vinyl floors

perfect replica of nature

barlinek.com

perfect replica of nature

Barlinek is a Polish company with many years of tradition and a world leader in the production of wood floors. We know all there is to know about natural floors.

That's why our modern vinyl floors are **inspired by nature**. It is nature and its creations that make an impression on this collection. The Next Step collection is a perfect combination of durability, strength as well as the colour scheme and structure of natural wood.

BIOD is a collaboration platform for architects that also provides support of professional advisers. The platform offers periodic free training for interior designers in many Polish cities, including our factory in Barlinek.

The platform also includes the international "**Creations from Nature**" competition, which Barlinek has successfully organised for several years. Thanks to many years of exchanging experience between Barlinek and designers, **BIOD** sets trends in the flooring colour and finish.

100% waterproof

The **Next Step vinyl floors** are made of 100% waterproof materials, they are not susceptible to moisture, and the floorboard joints are **waterproof**. For detailed information please refer to the installation manual and warranty card.

This means that Next Step floors are perfect for rooms such as kitchens, bathrooms and corridors. They can be installed **without restrictions, in all rooms of any grade of the home and office.**

The 14-day water impact test did not affect the floorboard structure and floor specification remained unchanged.

Diamond Shield coating

The advantage of modern Barlinek vinyl floors is high resistance to intensive use.

The anti-scratch, anti-static and dent resistant **DIAMOND SHIELD** coating protects the floorboards and makes the Next Step floors one the most durable on the market.

Thanks to the **DENSCORE™**, which contains no phthalates or heavy metals which are harmful to health, the floor is stable and does not deform due to changing temperature.

These floorboards are optimal for use in residential and commercial environments with **STANDARD TRAFFIC**.

Perfect floorboards for use in residential conditions and in commercial spaces with **HEAVY TRAFFIC**.

The **DENSCORE™** MAKES BARLINEK VINYL FLOORS DURABLE AND WATERPROOF.

Thanks to the high heat transfer coefficient, our floorboards are perfect for underfloor heating and cooling systems.

MEDIUM 4.2 x 180 x 1220 mm

Barlinek vinyl floors

BEVEL

It is a delicate cut along all 4 edges to optically distinguish individual floorboards and give the effect of a real wood floor.

DIAMOND SHIELD

a layer of durable polyurethane-mineral varnish protects the floor. Stain, scratch and dent resistant. Easy to maintain.

Modern Next Step vinyl floors offer a natural look and extraordinary durability for many years.

vast line

33

Synchronous structure perfectly matches wood. Ideal flooring for all **residential spaces**, optimal for commercial interiors with heavy traffic (**shops, offices, restaurants, school classrooms**, etc.). Finished with 4 side micro bevel and one of the best installation methods allowing for a drop lock single board installation. Large format floorboards with **DIAMOND SHIELD** — a special polyurethane protective coating that protects the floor – it is stain, abrasive and dent resistant.

Perfect floorboards for use in residential conditions and in commercial spaces with **heavy traffic**.

advantages of Barlinek vinyl floors

PERFECT REPLICIA OF NATURE

Realistic, wood patterns, created by nature, colours inspired by the most beautiful corners of the world.

100% WATERPROOF

Vinyl floors are not affected by moisture, and the floorboard joints are waterproof. For detailed information please refer to the installation manual and warranty card.

DIAMOND SHIELD COATING

A coat of durable varnish provides the highest resistance to micro-scratches resulting from intensive use.

A STABLE STRUCTURE

Barlinek vinyl floors are renowned for their exceptional stiffness. The maximum continuous floor area is up to 225 m²!

UNDERFLOOR HEATING

DENSCORE™ mineral core ensures excellent heat conductivity, making the Next Step vinyl floors suitable for both underfloor heating and cooling systems.

SAFETY

Barlinek vinyl floorboards are A+ certified, which confirms very low volatile organic compounds (VOC) emissions. The core of the **DENSCORE™** floorboard is made of a mineral composite material that does not contain any phthalates or heavy metals harmful to health.

SILENT USE

Modern Barlinek vinyl floors in combination with the Next Step **EXTREME 1.5** soundproofing underlay guarantee perfect soundproofing.

SAFE FOR PETS

Scratch-resistant and chemically resistant **DIAMOND SHIELD** coating makes vinyl floors ideal for pet friendly homes. Next Step floors are easy to clean which can be done frequently.

QUICK RENOVATION

Modern vinyl floors are great for quick upgrades on existing subfloors.

ECO-FRIENDLY

All materials used in production are subject to rigorous testing procedures to ensure there are no phthalates, heavy metals or other harmful emissions.

25-YEAR WARRANTY

Next Step vinyl floors are designed to last and look beautiful - especially when suitable care products are used.

RESTORE TO ORIGINAL CONDITION

The **DIAMOND SHIELD** coating is factory-conditioned for periodic chemical restoration treatments. Thanks to this, the floorboard surface will regain a nearly brand-new look.

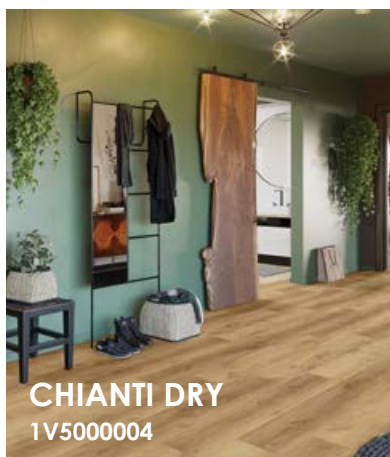

ANTISTATIC

The **DIAMOND SHIELD** coating provides floorboards with antistatic properties, preventing dust from accumulating on them.
